### PROFILE

I'm Roman Steele, a full-stack developer with experience in Blazor, ASP.NET 8.0, C#, and JavaScript. I'm passionate about problem-solving and creating intuitive solutions to complex challenges. Committed to continuous learning, I thrive in challenging environments that encourage growth and creativity.

### SKILLS

Blazor | ASP.NET 8.0 | PostgreSQL |

C# | JavaScript | HTML | CSS |

Bootstrap

### EDUCATION

#### Coder Foundry

Software Development

March 2024 – June 2024 | Kernersville, US

672 hour full-stack developer bootcamp

### PROFESSIONAL EXPERIENCE

#### Starbucks

Barista

September 2022 – October 2023 | O'Fallon, US

- **Team Collaboration:** Worked closely with colleagues to ensure smooth operations, enhancing my teamwork and communication skills.
- **Time Management:** Efficiently managed multiple tasks in a fast-paced environment, developing strong organizational abilities.
- **Problem-Solving:** Quickly identified and resolved operational issues, refining my ability to troubleshoot and find effective solutions under pressure.
- **Attention to Detail:** Consistently ensured order accuracy and quality, developing a meticulous approach to meeting precise standards.

My experience as a barista at Starbucks strengthened essential soft skills that are critical in full-stack development. Effective teamwork and problem-solving are key in collaborating with team members and addressing client needs. Managing multiple tasks and maintaining attention to detail are crucial for writing clean, efficient code and ensuring project success. This role has equipped me with a solid foundation in collaboration, organization, and precision, all of which are vital in a development environment.
