🔧 SKILLS

C# | ASP.NET Core | .NET 8 Blazor |
Web API | HTML | CSS | Bootstrap |
GitHub/Git | CI/CD | PostgreSQL

🎓 EDUCATION

Coder Foundry

Software Development

March 2024 – June 2024 | Kernersville, US

672 hour full-stack developer bootcamp

💼 PROFESSIONAL EXPERIENCE

Starbucks

Barista

September 2022 – October 2023 | O'Fallon, US

📁 PROJECTS

LazyBug

Bug Tracker

I created a bug tracker in three weeks that allows users to create tickets, with admins and project managers assigning them to developers. Tickets are organized by priority and completion status. I also implemented user roles for enhanced security, streamlining task management and improving workflow efficiency.

Check it out - <https://lazybug.up.railway.app/>

Tech Log

Blog

A blog web application that allows users to read articles I have written about web development. The platform offers an intuitive, user-friendly interface for browsing and accessing blog posts, with features like categorization, search functionality, and responsive design to enhance the user experience.

Stay Synced

Contact Book

I developed a contact book web application that allows users to create and organize contacts into categories. The application enables users to send emails to individual contacts or entire categories. Features include contact management, category grouping, and bulk emailing to streamline communication.

Portfolio

I created a portfolio website to showcase my work, featuring a sleek, responsive design for optimal viewing on all devices. The site offers a visually appealing and user-friendly interface, allowing visitors to easily navigate through my projects and achievements. I implemented features such as project categorization, detailed descriptions, and interactive elements to highlight my skills and experience effectively.
